

Certificate 'supervision of medication intake'

Dear parent(s),

No medication is administered in the boarding school.

In recent years, we have been asked more and more to supervise the intake of medication at boarding school.

We would have liked to make the following agreements about this:

- If your daughter/son needs to take chronic medication, we ask you to have the certificate below completed by the attending physician.
- If your daughter/son needs to take temporary medication, for example as a result of an infection, a statement from the parents will suffice.
- The boarding team can never be held responsible for any side effects your child may experience after taking this medication.

In case of doubts or questions from the boarding school, it may be necessary for us to contact your doctor.

Sincerely,
The administrator

Certificate from the attending physician, to be handed over to the boarding school

Name of the intern:

Name of the medication:

.....

Dose:
